DETAILED ACTION

Status of Claims

Claims 1-20 are pending.

Claims 1-20 are rejected.

Response to Amendment

The recent amendment filed December 28, 2006 has been received and acknowledged by the Examiner.

Response to Arguments

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Applicant's arguments filed December 28, 2006 have been fully considered but they are not persuasive. Applicant argues that the Examiner has based the rejection on hindsight and an "obvious to prepare" theory. Applicant also argues that the genus taught by the prior art, Tedeschi et al, is too broad.

The Examiner contends that it is indeed obvious to prepare acetylenic alcohol as claimed as Tedeschi et al has given a process to do just that. Therefore, if one having ordinary skill in the art would wanted to prepare an acetylenic alcohol as claimed, one would find a process to do just that in the Tedeschi et al disclosure. This should not get confused with the "obvious to try" doctrine. Also, the Examiner contends that Tedeschi

Art Unit: 1621

et al teaches the use of acetone in his preparation. Acetone is a direct homolog of the methyl ethyl ketone claimed. Therefore, it would be obvious for one having ordinary skill in the art to utilize the process taught by Tedeschi et al in order to arrive at the same compounds or direct homologs of those same compounds as claimed by applicant.

Applicant also claims that the molar ratio of acetone:alkali metal hydroxide is much more than that claimed by applicant and that applicant claims "less than 1:200", but wherein the description in Tedeschi et al only goes as low as 1:11.9 which is still greater than that which is claimed.

The Examiner contends that Tedeschi et al have taught all of the elements of the invention and applicant has failed to show any unexpected results when using such a molar ratio. Therefore, applicant must introduce to the Examiner where there are unexpected results in order to claim the molar ratio as being patentably distinct over the prior art. Tedeschi et al is preparing the same class of compounds as the applicant has claimed; therefore it is not considered to be patentably distinct without a showing of unexpected results.

It is for these reasons and those set forth in the prior office action dated September 25, 2006 that the rejection of claims 1-20 under 35 USC 103(a) as being unpatentable over Tedeschi et al (US 3,709,946) is maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1621

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
